PROFESSIONAL SUMMARY

ICT undergraduate and full-stack developer experienced in building database-driven web applications with React.js, Node.js, and REST APIs, including authentication, backend architecture, and third-party service integration (Firebase, MongoDB). Comfortable across the stack from UI to API to database, with solid Git/GitHub workflow practice. Currently building practical knowledge of LLM APIs, prompt engineering, and agentic AI systems, and looking to apply this backend foundation toward developing AI agent and conversational features for DealMate AI's escrow and deal platform.

TECHNICAL SKILLS

Backend & APIs	Node.js, Express.js, REST API design & integration, Authentication & access control
Languages	JavaScript, HTML5, CSS3
Databases	MongoDB, Firebase
Frontend	React.js, Tailwind CSS
Developer Tools	Git, GitHub, Netlify, Vercel
AI / Currently Learning LEARNING	LLM & OpenAI-style APIs, Prompt Engineering, AI Agents / Agentic AI, RAG & Vector Databases

PROJECTS

Tuition Management System

Live Demo **GitHub**

- Architected a role-based tuition management platform enabling separate student and tutor workflows for posting, browsing, and applying to tuition listings
- Implemented secure authentication and role-based access control to protect user data and restrict feature access by user type
- Designed and integrated REST API endpoints connecting the React frontend to Express/MongoDB backend services

Stack: *React.js, JavaScript, Tailwind CSS, Express.js, MongoDB, Firebase*

PAWMART — Pet Product E-Commerce Platform

Live Demo **GitHub**

- Built a full-stack e-commerce marketplace with dynamic product listings backed by a MongoDB database and Express REST APIs
- Developed shopping cart and order management functionality handling real-time state updates across the application
- Deployed a fully responsive, mobile-and-desktop-optimized UI, live on Netlify with backend services integrated end-to-end

Stack: *React.js, JavaScript, Tailwind CSS, Express.js, MongoDB, Firebase*

EXPERIENCE

Project-Based MERN Stack Developer — *Academic & Personal Projects*

- Built and maintained full-stack MERN applications as part of academic coursework and independent projects
- Integrated React frontend components with Express/Node.js backend services and MongoDB/Firebase databases
- Used Git and GitHub for version control, branching, and collaborative development workflows

EDUCATION

Mawlana Bhashani Science and Technology University

3rd Year, 1st Semester (Running)

B.Sc. in Information and Communication Technology (ICT)

LANGUAGES & ADDITIONAL SKILLS

Languages: English (Intermediate), Bangla (Native)

Interpersonal: Communication, Team Collaboration, Problem Solving, Time Management
